SensoControl®

Diagnostic Test Equipment for Hydraulics

Parker

ENGINEERING YOUR SUCCESS.

All the instruments meet the guidelines of the European Community (EU).
It is confirmed that these products are approved acc. to following standards.

CE

DIN/EN 61000-6-2
DIN/EN 61000-6-3

Note!

This document and other information from Parker Hannifin GmbH, provide product or system options for further investigation by users having technical expertise. Before you select or use any product or system it is important that you analyse all aspects of your application and review the information concerning the product or system in the current product catalogue. Due to the variety of operating conditions and applications for these products or systems, the user, through his own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance and safety requirements of the application are met. The products are subject to change by Parker Hannifin GmbH at any time without notice.

Technical subject to change. April 2024.

Product overview

Measuring device and test kit

ServiceJunior

- ✓ Easy to use, robust and reliable
- ✓ Measurement ranges up to 1000 bar
- ✓ Accuracy up to 0.1%
- ✓ Data logger function optional

Page 8

Parker Serviceman Plus

- ✓ Easy to use, robust and reliable
- ✓ Automatic sensor recognition
- ✓ Up to 3 sensors
- ✓ PC connection
- ✓ SensoWin® 7.1 PC software

Page 14

The Parker Service Master COMPACT

- ✓ Easy to use, robust and reliable
- ✓ 3 versions for up to 6 sensors with sensor recognition and 2 auxilliary sensors
- ✓ SensoWin 7.6 PC software

Page 19

The Parker Service Master CONNECT

- ✓ Intuitive operation, robust and reliable
- ✓ Modular system with individually exchangeable measuring modules
- ✓ Record, save and analyse measurement data
- ✓ SensoWin 7.6 PC software

Page 24

SensoWin® PC software

- ✓ Data analyses
- ✓ Online measurements
- ✓ Creating measurement protocols

Page 30

ServiceJunior Test kit

- ✓ Easy generation of pressures for testing and adjusting pressure gauges and sensors

Measuring devices

Measuring instruments

- Long-term stability
- Robust designs
- Easy handling
- Flexible on-site use
- Documentation of the measured values

SensoControl® Hand-held measuring devices and accessories – the right measuring tool for every application. Whether you work in industry, mobile hydraulics, service or repair: Measuring and working with hydraulic variables is the basis for reliable troubleshooting. Systematic troubleshooting with modern tools is therefore essential for today's service technicians.

Rapid processes - such as switching valves, cylinder strokes, pressure peaks, differential pressures and changes in flow - must be measured and evaluated at the same time.

SensoControl® hand-held measuring devices have been specially designed for these requirements:

- Measurement and display of hydraulic parameters such as pressure, differential pressure, pressure peaks, temperature and flow as well as speed.
- For mobile measurement data acquisition with high accuracy and easy operation.

We manufacture and test all **SensoControl**® hand-held measuring devices and accessories in our own production facilities. Our constantly growing demands on quality and flexibility make Parker a reliable partner.

1 ServiceJunior

ServiceJunior with data logger

- Digital pressure measurement and back-lit display
- Measurement ranges up to 1000 bar
- Accuracy up to 0.1%
- Data logger function with integrated memory and real-time clock optional
- Pressure peak capture at 10-ms sample rate
- MIN/MAX value display
- Extremely robust and reliable thanks to metal housing
- Start/stop measurement means no more complex calculations and lengthy configurations
- Optimal storage thanks to automatic data compression

The ServiceJunior allows you to measure, display and store pressures in one device.

Its extremely robust metal housing design and easy operation make it stand out from the competition.

Several mechanical pressure gauges are often required for accurate measurements over a wide pressure range. Thanks to its high accuracy, resolution and long-term stability as well as the 4 1/2-digit display, the ServiceJunior does this job all by itself.

Pressure peaks are securely captured at a sample rate of 10 ms. The MIN and MAX function saves minimum and maximum pressures automatically and calls them up at the touch of a button.

The optional data logger with real-time clock records the current measured values as well as the minimum and maximum values. The signature Parker start/stop function with automatic data compression makes complex calculations and lengthy configurations a thing of the past. A measurement of up to 24 hours is simply started at the push of a button. The stored measurement data is transferred to a computer or laptop via the USB interface. Thanks to the universal CSV format, the data can be evaluated and documented without special software.

The device offers all the advantages of digital pressure measurement at great value for money.

Applications:

- Maintenance and service
- Pressure test
- Fault-finding
- Leak test
- Monitoring and commissioning
- Quality assurance and Laboratory

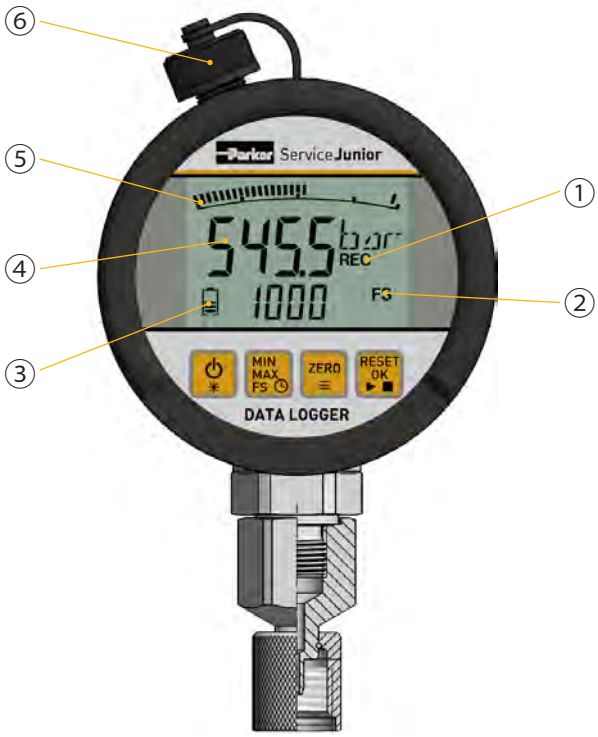
Functions:

- Min/MAX display
- Adjustable display filter
- ZERO function
- Configurable automatic shutdown
- Switchable units
- Optional data logger and real-time clock

Markets:

- Mobile hydraulics
- Industrial hydraulics
- Pneumatics
- Plant and mechanical engineering
- Environmental engineering

Functional description



No.	Function	
①	REC display, flashes when data recording is active***	
②	MIN/MAX or FullScale display, depending on the setting	
③	Battery level indicator	
④	Actual value display	
⑤	Bar graph with peak and hold functions	
⑥	Mini-USB port*	
⏻ ☀	ON/OFF key	Switch device on/off. Press for 2 s: Switch on the backlight for 20 s.
MIN MAX FS	MIN/ MAX/FS key	Select additional display value: Decrement MIN, MAX or FS/time*. Press for 2 s: Set the time (CSV formatting)*.
ZERO ≡	ZERO/ MENU key	Zero point adjustment/increment time*. Press for 2 s: Open the menu.
RESET OK	RESET/ OK/ START-STOP key	Delete MIN and MAX values from the memory. Confirm menu functions. Press for 2 s: Start/stop measurement*.

2 Parker Serviceman Plus

Parker Serviceman Plus

- Easy handling
- Robust design with oil-resistant rubber protection
- Plug & Play functionality
- Large backlit display
- Direct storage on nano USB stick
- PC connection
- Including SensoWin® PC software
- Available in 2 versions:
  Analogue or CAN

Analogue version

CAN version

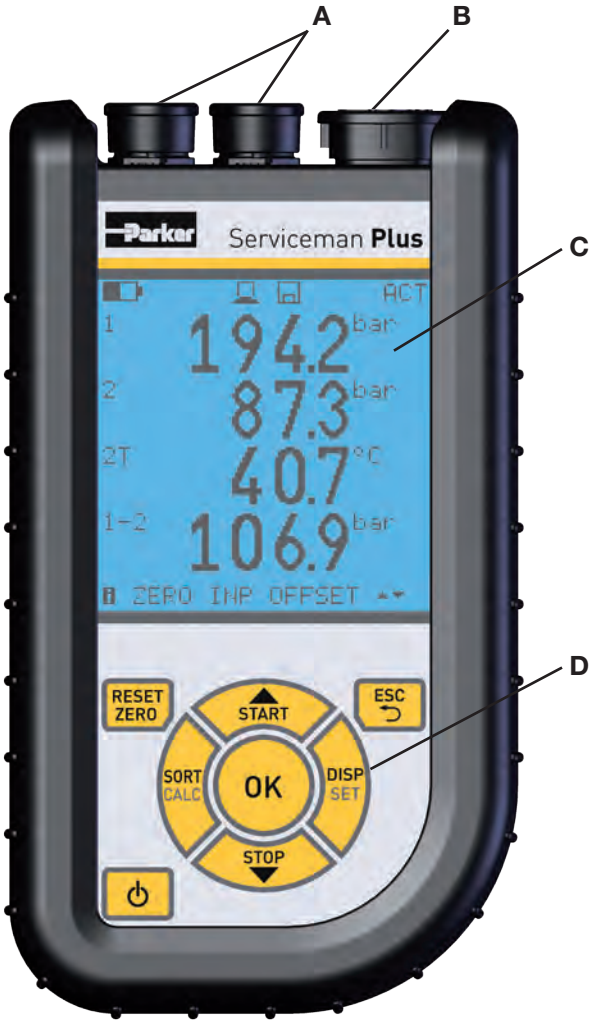
Of the **Parker Serviceman Plus** is a mobile, extremely robust and easy-to-use measuring instrument for many measuring tasks in mobile hydraulics or in stationary hydraulic systems.

With the automatic sensor recognition, you can simply plug in pressure, temperature, flow or speed sensors and start measuring immediately.
There is no need to parameterise the sensors because the measuring ranges are automatically scaled and the measured value shown on the display.

Advantages of the Parker CAN bus

- Cable lengths up to 50 m
- Low wiring effort, up to 3 sensors on one bus line
- High interference resistance due to digital data transfer
- Plug & Play functionality without parameterisation

Functional description



A	Sensor connections
B	USB connections for external hard drive, charging function and data transfer to PC
C	Illuminated display
D	Keyboard
⏻	Switching on and off
RESET ZERO	■ Resettable MIN and MAX values ■ Zero-point adjustment
ESC	Back
OK	Confirm selection
SORT CALC	■ Rearrange channels in the display ■ Insert calculation channel
DISP SET	■ Toggle display: MIN and MAX values, sensor end value or temperature ■ Basic device settings

Technical data

	SCM-155-0-02 analogue	SCM-155-2-05 CAN
Inputs		
Sensor inputs	2 Parker analogue sensors with sensor recognition	CAN bus interface for up to 3 Parker CAN bus sensors with sensor recognition
Measuring accuracy	< ± 0.2 % FS ± 1 digit	–
Plug-in Connection	5 pin, push-pull	5 pin, M12x1, SPEEDCON®, plug
Sample rate	1 ms	1 ms
Interfaces		
USB device	Online data transfer between device and PC via PC software SensoWin®, measured value transfer: ACT/MIN/MAX, min. 5 ms, USB standard: 2.0, full speed, plug connection: Micro-USB socket, shielded, type B	
USB host	Port for USB stick, max. 4 GB, recommended types: Delock USB 2.0 Nano-Stick, Intenso Micro Line, USB standard: 2.0, full speed, max. 100 mA, plug connection: Micro-USB socket, shielded, type B	
Memory		
Internal measured value memory	1 measurement, approx. 15,000 data records (270,000 measured values ACT/MIN/MAX), max. 24 h per measurement	
USB stick	4 GB included	
Storage format	Choice of SCMO (SensoWin compatible) or CSV	
Functions	Difference, addition, hydraulic power, ACT, MIN, MAX, FS, TEMP display, battery status, start/stop measurement with automatic data compression, adjustable display filter	
Display indication		
Type	FSTN-LCD, graphic, with LED backlight	
Visible area	62mm x 62mm	
Resolution	130 x 130 pixels	
Power supply (external)	Micro USB socket, type. B, + 5V DC, max. 1,000 mA	
Rechargeable battery		
Type	Lithium-ion pack, 3.7 V DC / 2250 mAh	Lithium-ion pack, 3.7 V DC / 4500 mAh
Battery charging time with power supply unit	approx. 3.5 h	approx. 7 h
Battery discharge time	> 8 h, with 2 sensors	> 8 h, with 2 CAN bus sensors
Housing		
Housing material	PC/ABS/POM	
Housing protective cover material	TPU	
Dimensions (W x H x D)	96 x 172 x 54 mm	
Weight	approx. 530 g	
Ambient conditions		
Ambient temperature	0…+50 °C	
Storage temperature	-25…+60 °C	
Rel. Humidity	< 80 %	
Environmental impact test	DIN EN 60068-2-32 (1 m free fall)	
Protection class	IP54 EN 60529	IP67 EN 60529
SensoWin® PC software	Read-out, display, computer analysis of measured data, read-out, alteration of device settings, loading of device settings from library onto hand-held device

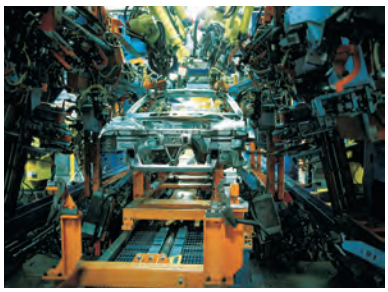
The perfect blend of advanced features, robustness, and affordability without any compromises.

The Parker Service Master COMPACT is a versatile, innovative device ideal for service applications in sectors like construction, agriculture, railway, and defence. It provides real-time monitoring and diagnostics of key parameters such as pressure, temperature, and flow rate, enabling proactive issue detection. Housed in a robust IP65 casing with a 4.3" touch screen, it allows on-site initial analyses and swift rectification of machine defects. The device, available in three versions, is compatible with various Parker sensors and comes with complimentary SensoWin 7 software for easy data upload and documentation. Despite its advanced features, it's user-friendly, cost-effective, and designed for technicians of all experience levels, enhancing efficiency and productivity. Its compact, lightweight design makes it ideal for transportation and use in different locations.

Application

- Mobile equipment
- Industrial hydraulic systems
- Fluid or gas maintenace and trouble shooting
- System performance optimization
- System validation
- Test equipment and technology



Markets

- Maintenance and Repair, MRO
- Mobile
- Agriculture
- Construction
- Transportation
- Defence
- Industrial
- Molding
- Testing

3 The Parker Service Master COMPACT

Features

Automatic sensor recognition, simply plug in and start measuring

USB interface to PC for online measurement or convenient analysis and documentation via SensoWin software

Practical storage concept with integrated portable USB stick

Power supply via standard USB C PD charger

Start/Stop measuerement with automatic data compression or manual adjustment of storage time and rate

Screen shots at push of a button

Pressure, temperature, flow, rpm and frequency, etc. – everything is measured, saved, monitored and analyzed

Curve graph or numeric display

4,3” touch display and plain text navigation for easy operation, suitable for use with gloves

Measure and display up to 16 channels

Additional tactile keyboard for operation even under difficult conditions

Robust design with oilresistant rubber protection for use under harsh conditions

Configurations

The Parker Service Master COMPACT is available in three different versions and therefore offers a wide range of options for different sensor types and configurations.

SCM-370-0-02 for 4 Parker analogue sensors with automatic sensor recognition and 2 auxiliary analogue sensors.

SCM-370-1-05 for 6 Parker CAN sensors with automatic sensor recognition and 2 auxiliary analogue sensors.

SCM-370-2-05 for 6 Parker CAN sensors with automatic sensor recognition.

Technical data

Input/Output	
Sensor input CAN (only SCM-370-1-05 and SCM-370-2-05)	1 CAN bus network for max. 6 Parker CAN sensors with sensor recognition Terminating resistor permanently installed internally Connector: 5-pin, M12x1 built-in plug (male) Sampling rate: up to 4 sensors 1 ms, 5 or 6 sensors 2 ms
Analogue sensors with sensor recognition (only SCM-370-0-02)	4 sensor inputs (up to 8 analogue measuring channels) With sensor recognition (p/T/Q/n) for SensoControl® diagnostic sensors Connector: 5 pin, push-pull, combination male/female connector Sample rate: 1 ms = 1,000 measured values/sec. Accuracy: 0.1% FS
Inputs for external sensors	1 connection with 2 inputs (analogue) for measuring current and voltage Voltage measuring range: -10...+10 VDC Current measuring range: 0/4...20 mA Supply for external sensors: +24...+24 VDC/max. 100 mA (for both inputs) Connector: M12x1, 5 pin socket Sample rate: 1 ms = 1,000 measured values/sec., FAST-MODE 0.1 ms = 10,000 measured values/s
Touch-Display	4,3", 800 x 480 pixels, brightness: 450 cd., glove operation possible
Calculation channels	
Quantity	2
Functions	Subtraction, addition, multiplication, power, volume
Interfaces	
USB-C (Communication and power supply)	in accordance with IEC 62680-1-3, USB PD 3.0, 5V, 12V, 20V, Current consumption max. 2.5A at 5V, 1.8A at 12V, 1.2 A at 20V, for fast charging a USB-C compatible charger with min. 45W is required, alternatively via USB-A/C cable (included in delivery) 5V max. 2 A
USB-A (host)	USB 2.0, fullspeed, 12 Mbit/s max. memory size 128 GB
Ambient conditions	
Ambient temperature	-20…+50°C
Storage temperature	-30…+80°C
Rel. Humidity	max. 95% non-condensing
Environmental impact test	Drop test 1m (EN 60068-2-31:2008)
Vibration	DIN EN 60068-2-6:2008-10
Protection class	IP 65 (EN 60529:1989 +A1:1999 + A2:2013)
Rechargeable battery	Lithium-ion pack, 7.2 V / 3500 mAh / 25.44 Wh
Material	
Housing	ABS/PC
Housing seal	TPE
Housing protective cover	TPE
Dimensions (W x H x D)	215 x 60 x 154 mm
Weight	approx. 850 g
VESA connection	75 x 75 mm

Scope of delivery

Device (incl. Nano USB-Stick, USB charging und connection cable1m USB A auf C)	
Analogue AUX device (4 Inputs for Parker analogue sensors + 2 inputs for standard industrial sensors)	SCM-370-0-02

4 The Parker Service Master CONNECT

The Parker Service Master CONNECT

- Up to 100 channels enable complex measuring tasks
- The illuminated 7" touch display and the well-designed user interface make use intuitive
- The additional tactile keypad enables safe operation even under adverse conditions
- The right expansion level for every application thanks to individually exchangeable measuring modules
- SensoWin® software included in the supply package. This enables you to analyse measurements and create test reports easily.

The Parker Service Master CONNECT is a powerful diagnostic measuring device for mobile, stationary hydraulic applications, e.g. in the area of service, commissioning and development. It safely and accurately records values such as pressure, temperature, flow and frequency.

Thanks to the robust IP65 design, it offers comprehensive protection against moisture and dirt and is resistant to impacts. Therefore, the device is very suitable for use in harsh environments.

The 7" large, illuminated, non-reflective display enables smooth, intuitive operation. The clearly structured user interface which enables fast and secure measurement setting configuration makes the device easy to use.

The modular measuring device hardware and software enables customised set-up according to individual measuring and analysis needs. It measures and displays up to 100 channels and is therefore also suitable for very complex diagnostic tasks. The **Parker ServiceMaster CONNECT** is a state-of-the-art device that is equipped with various interfaces such as Parker CAN, CANopen, SAEJ-1939, analogue, digital, frequency, Wifi and Bluetooth LE.

Functional description

High protection against moisture and dirt, protection class IP 65

Illuminated and non-reflective colour display for good readability in all situations, 7 inches large for clear overview with comprehensive information

Integrated holder for carrying strap

Additional large tactile keyboard for safe operation even in difficult conditions

Robust, oil-resistant housing protection for use in harsh environments and for absorbing shocks

Suitable for use with gloves, robust 3 mm glass, resolution 800 x 480 pixels

Intuitive operation thanks to clear icons and function-related buttons and apps

Power supply unit with universal country adapters, strong battery power and fast charging times, energy saving options for long operating times

Analogue input module for connecting Parker sensors with sensor recognition

Analogue third-party sensors - also with high-speed functionality

CAN module for monitoring CAN systems or for connecting external CAN sensors

LAN interface for remote monitoring, transmission of measured values or remote control

USB host interface for connecting USB mass storage devices

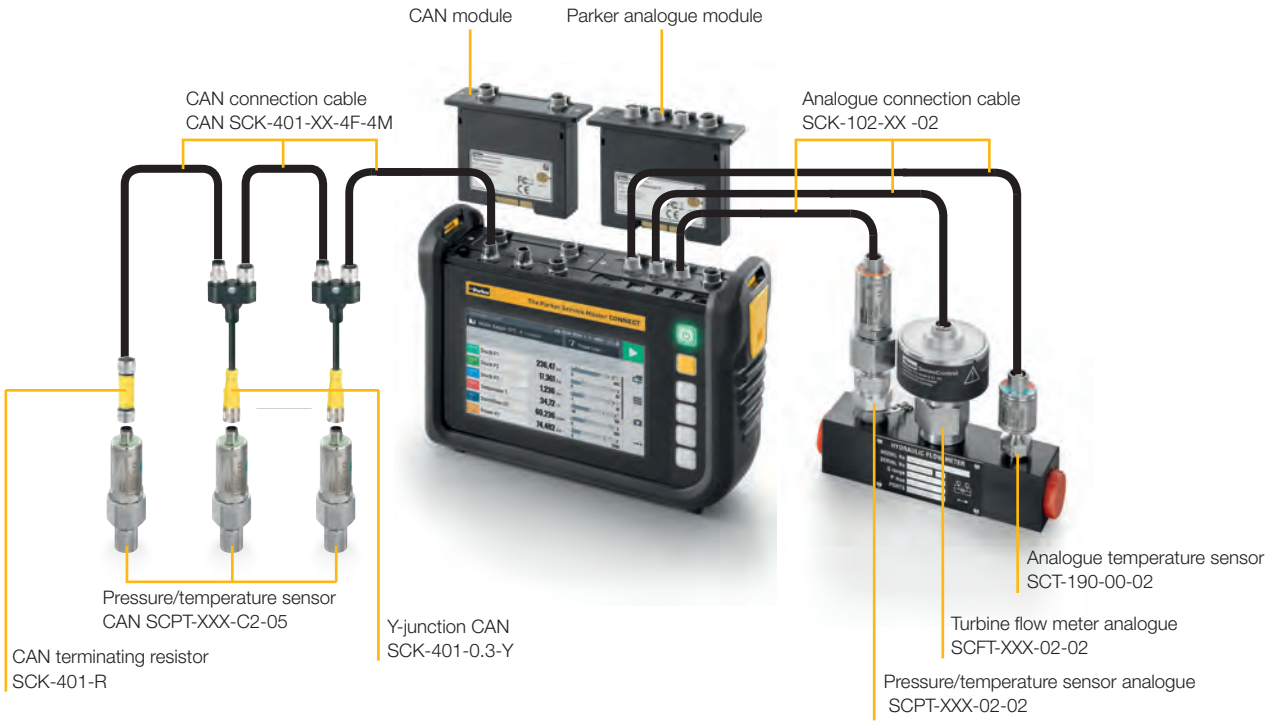
2 x CAN bus networks with up to 24 channels each

SIM card slot

USB device interface for connecting to PC, laptop etc.

2 frequency inputs or D-IN/D-OUT

4 The Parker Service Master CONNECT

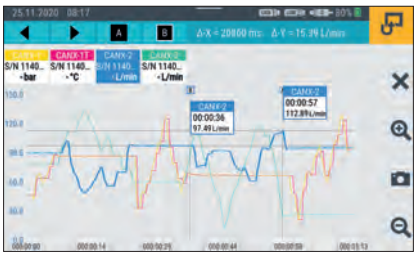


- Up to 12 channels in one display
- Colour assignment of the individual channels
- Display can be changed between ACT, MIN and MAX values

- Numerical representation of 6 channels with bar graph
- Display of measuring range, warning and alarm values as well as MIN and MAX values

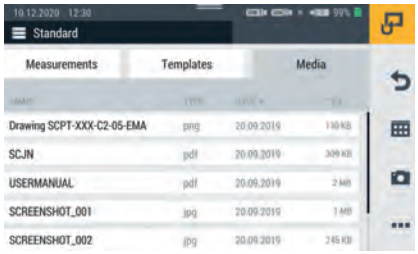
- Variety of measurement options for a wide variety of applications

- Up to 8 freely selectable channels simultaneously in one curve display
- Choice between ACT and MIN/MAX value display
- Free scalability
- Up to two cursors with measured value and delta display can be displayed for analysis purposes



- Recurring measurement tasks can simply be saved as a template
- When selecting the template, the pre-set measurement set-up is also compared
- Using a template ensures the comparability of the measurements
- An existing template can be duplicated and modified as required

- Up to 4 calculation channels can be created
- In addition to the predefined standard functions such as delta values or hydraulic power, free formulas can also be entered



- In addition to measurement files and templates, images, reports and other documentation files can also be managed

Technical data

The Parker Service Master CONNECT	
Inputs/outputs	
CAN sensor inputs	2 CAN bus networks with 24 Parker CAN bus channels each. Alternatively on CAN Y up to 5 third-party CANopen sensors. Baud rate adjustable for external CAN. 24 VDC power supply/ max. 250 mA. Mixed operation of Parker CAN and external CAN is not possible within a CAN bus line. Internal terminating resistor 120 ohms. Supports CAN 2.0 A/CAN 2.0 B.
Sample rate	1 ms = 1,000 measured values/s
Plug-in Connection	M12x1, 5 pin with SPEEDCON®, Built-in connector
D-IN/OUT F1/2	Double-assigned input that can be used either as DIGITAL-IN and DIGITAL-OUT, or by switching, two frequency inputs are made available. Also possible as direction of rotation detection.
Connection	M12x1 SPEEDCON® female. (5-pin)
Input	Galvanically isolated
Supply	24 V_{DC} 80 mA
Input signals	Frequency (0 Hz ... 20 KHz)
Level/threshold	Active low: 0-1.4 V, active high: 3-30 V
Accuracy	≤± 0.1%
Input module slots	Flexible assembly with up to 2 modules
Touch display	7“, 800 x 480 pixels, brightness: 450 cd. Use with gloves possible.
Calculation channels	
Quantity	4
Functions	/, *, +, -, f´(t), Integral, sin, cos, tan, x2, SQRT, xy
Maximum number of offsetting channels / Calc channel	3
Interfaces	
USB device	Data transmission between device and PC
USB host 1	USB 2.0, connection of external storage media
USB host 2	USB 2.0, connection of external storage media
Memory	12 GB
LAN	Connection of network cables
SIM card	MINI-SIM insertion
Wireless communication	SMC-600-00: WLAN, Bluetooth LE (Europe)
Ambient conditions	
Ambient temperature	-10…+50 °C
Storage temperature	-20…+60 °C
Rel. Humidity	< 80 %
Environmental impact test	Drop test 1m (EN 60721-3-7)
Vibrations	EN 60721-3-7, 7M3
Protection class	IP 65 (EN/IEC 60529:2014)
External power supply	110/240 V_{AC} - 24 VDC/3.5 A car charging cable as an accessory (12/24 V_{DC})
Connection	3-pin
Rechargeable battery	Lithium-ion pack, 14.4 V/3350 mAh
Material	
Housing	ABS/PC (thermoplastic resin)
Housing protective cover	TPE (thermoplastic elastomer)
Flammability Class	UE94VO
Dimensions (W x H x D)	282 x 195 x 85 mm
Weight	1880 g (without input module)
VESA connection	100 x 100 mm / M4 metric

SPEEDCON® is a registered trademark of PHOENIX CONTACT GmbH & Co. KG

4 The Parker Service Master CONNECT

Input module SCMI-600-01 Parker Analogue	
Inputs with sensor recognition	3 sensor inputs (up to 6 analogue measurement channels) With sensor recognition (p/T/Q/n) for SensoControl® diagnostic sensors Push-in connection: 5-pin, push-pull, combination panel plug/socket Sample rate: 1 ms = 1,000 measured values/sec.
Inputs for external sensors	2 sensor inputs (analogue) For measuring current and voltage Sample rate: 1 ms = 1,000 measured values/sec. Voltage measuring range: -10…+10 V_{DC} Current measuring range: 0/4…20 mA Supply ext. Sensors: +24…+24 V_{DC}/max. 100 mA Push-in connection: M12x1, 5 pin socket FAST-MODE sample rate: 0.1 ms = 10,000 measured values/s
Supply	24 V_{DC} 100 mA
Input signal range	-10…+10 V 0/4…20 mA
Operating temperature range	-10 °C…+50 °C
Storage temperature range	-20 °C…+60 °C
Weight	152 g
Accuracy	±0.1 % FS

Input module SCMI-600-02 CAN	2x M12x1.5 pin connector inputs for connection to CAN systems such as CANopen, CAN generic and SAE-J1939
Connections	2 x M12 5-pin female
Designation	CAN1xx, CAN2xx, each galvanically isolated
Channels CAN1xx	24
Channels CAN2xx	24
Standards	CAN 2.0 A, CAN 2.0 B,
Protocol support	CANopen, SAEJ1939 and CAN generic, mixed operation of several CAN protocols possible
Terminating resistor	Can be switched on/off
Signal connection supply	Passive, no external supply
Operating temperature range	-10 °C…+50 °C
Storage temperature range	-20 °C…+60 °C
Weight	127 g

Input module SCMI-600-03 Parker Analogue iso	Like SCMI-600-01 Parker Analogue, but module galvanically isolated from The Parker Service Master CONNECT

Order codes and accessories

The Service Master CONNECT (without input modules) — x- SCM-600 - xx

Included in the supply package:

- Power supply with country adapters: EUR/UK/US/AUS
- USB-2.0 cable (2 m)
- PC software

The Service Master CONNECT Kit (without input modules) — x- SCKIT-600 - xx

Included in the supply package:

- Device in trolley case SCC-600 incl. Power supply with country adapters
- 1 x Carrying strap SC-ACC-02
- 2 x Connection cable CAN SCK-401-05-4F-4M
- 2 x Terminating resistor SCK-401-R
- 2 x Adapter SCA-EMA-3/3
- 2 x Measuring hose SMA3-1500CF

5 SensoWin® PC software

SensoWin® PC software

- Compatible with Windows 10/11 (32 and 64 bit)
- Zoom functions
- Linking of measurement curves
- Freely definable calculation channels
- Cursor functions
- Remote connection/remote control
  The Parker Service Master CONNECT
- Data transfer to/from
  The Parker Service Master via
  USB, LAN, WLAN
- Documentation print-out
- Export function
- Online measurement

General

The PC software **SensoWin®** is an easy to operate software package for reading and processing the measured curves recorded by the **Parker Serviceman Plus or** the **The Parker Service Master CONNECT** .
Documentation and certificates can be created easily and at low cost since the PC software **SensoWin®** can make use of all Windows features and advantages.

Functions

The curves can be represented in a diagram. The curve shifting function allows exact hydraulics analysis.
A power performance curve can be created to evaluate a pump. Leaks and pressure losses can be detected by generating a differential value function.
With the cursor, a hydraulic procedure can be examined in a time-dependent way. Extensive information exists for each curve, i.e. the measurement with the **Parker Serviceman Plus, or** the **The Parker Service Master CONNECT** can be reproduced at any time.
Changing scales and units allows later adjustment for presentation in a diagram. Tabular representation of ACT, MIN and MAX values, smoothing of the measurement curve and mathematical links are important functions in the analysis of the hydraulic system.
Date and time are documented with each measurement. This considerably facilitates the later allocation of values.
Direct transmission of measured values from the **Parker Serviceman Plus or the Parker Service Master CONNECT** to the PC is also possible.
Current events (pressure peaks, etc.) are visible while the process is running (online function).

6 ServiceJunior Test kit

ServiceJunior test kit

- Easy generation of pressures for testing and adjusting:
  - Pressure meters
  - Pressure sensors
  - Pressure switches
  - Safety valves
- Also suitable for mobile use
- Pneumatic version from -0.95 - 60 bar and hydraulic version from 0 - 700 bar
- No additional power supply necessary
- Includes large set of adapters

Hand pump + reference = test kit

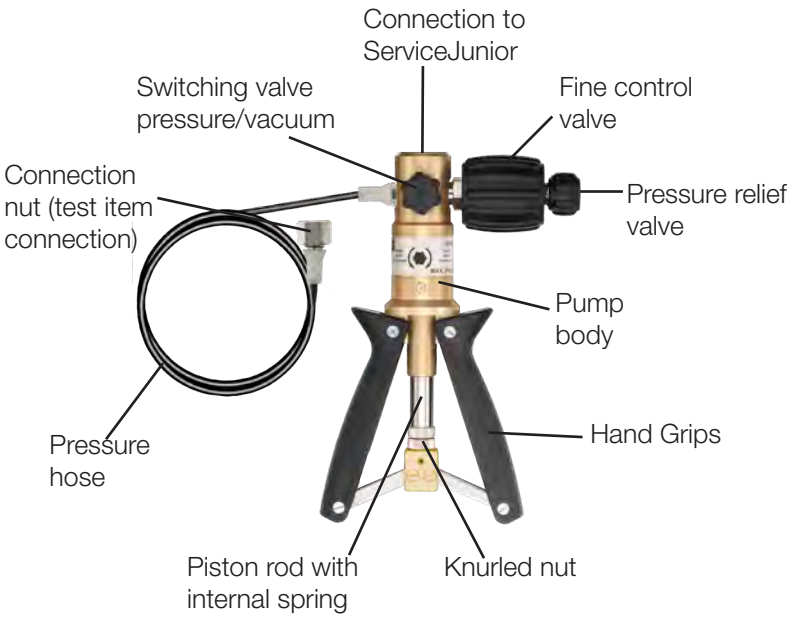
Whether in industry, mobile hydraulics, service or repair: the pressure value is decisive for ensuring the functioning and productivity of machines and plants. The pressure transmitters, sensors and pressure switches used here can suffer from ageing, wear or other influences, leading to incorrect measured values or switching points.

The ServiceJunior Test kit makes it easy to test manometers and pressure sensors, set pressure switches and more. The kit consists of a hydraulic or pneumatic hand pump used to generate a defined test pressure, plus a Service Junior as the reference device. Air, water or oil is used as the pressure medium.

Simply connect the unit to be tested to the hand pump. The connection hose and a large set of adapters are included in the supply package.

The required test pressure is generated by pumping and precisely set using the regulating valve. The proven ServiceJunior acts as a reference and pressure display with an accuracy of 0.1 %. By comparing the pressure display with the measured value of the test item, the test item is checked and can be adjusted if necessary.

Functional description



Pressure measurement

1. Connect the test item to the pressure hose using a suitable adapter.
2. Generate test pressure by pressing the handles together.
3. Set the test pressure exactly via the fine adjustment valve.
4. If necessary, reduce the test pressure via the pressure relief valve.
5. Compare the measured value of the test item with the reference value of the highly accurate ServiceJunior.

Current/voltage/frequency meter SCMA-VADC-710

- Current/voltage or frequency measurement with our hand-held measuring devices
- Connection of external sensors (e.g. for measuring torque, force or displacement) to our hand-held measuring devices
- Galvanic isolation - high safety even when using several adapters
- CAN and analogue output - compatible with our new hand-held measuring device

Applications:

- Force-path diagram
- Torque-volume flow characteristic
- Current consumption at proportional valve
- Measurement of switching states of motors/ pumps

Data:

- Voltages up to ± 48 V
- Currents up to ± 4 A
- Frequencies up to 5 kHz
- Supply of external sensors up to 24 V

Sensors

Pressure/temperature/RPM measurement

Various sensors are available depending on the requ
the measuring task:

Type SCP pressure sensors

- Robust stainless steel design
- Response times of 1 ms
- Capturing of pressure peaks
- Accuracy ±0.5 %
- Diagnostic adapters

Pressure/temperature sensors Type SCPT

- Robust stainless steel design
- Response times of 1 ms
- Capturing of pressure peaks
- Accuracy ±0.5 %
- Diagnostic adapters

Temperature sensors Type SCT

- High pressure-resistant temperature sensors for measurements in hydraulics
- Measurement of temperatures up to 1000 °C
- Screw-in or rod sensors

Rev. counter Type SCRPM

- Contactless speed measurement
- Measurement of speeds up to 10,000 RPM
- With 3 m fixed cable

8 Pressure measurement SCP analogue

Pressure measurement SCP analogue

- Small size
- Robust stainless steel design
- Response times of 1 ms
- Capturing of pressure peaks
- Accuracy ±0.5 %
- Laser-welded and labelled

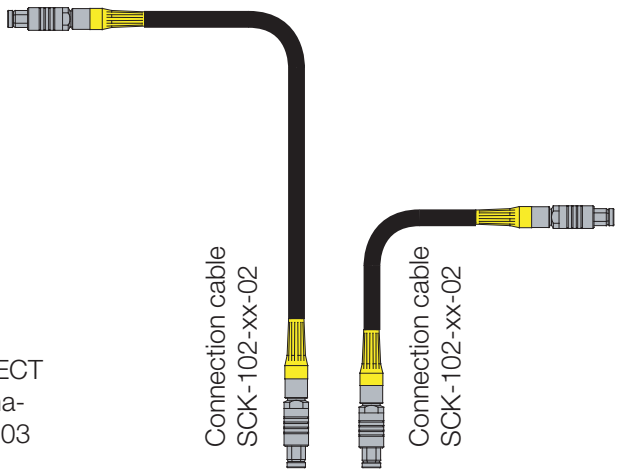
Fast response times guarantee reliable detection of disruptive pressure peaks in the hydraulic system. The robust stainless steel design allows a variety of applications such as for cooling water or in compressed air systems.

All pressure sensors are delivered with a diagnosis adapter (M16x2) installed. Fast and safe connection to the hydraulic system is ensured. Installation times are reduced.

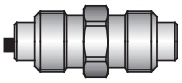
Pressure measurement	
-1... 015 bar	Pneumatics/negative pressure
0 ... 060 bar	Medium pressure range
0 ... 150 bar	Medium pressure range
0 ... 400 bar	Hydraulic operating pressure
0 ... 600 bar	High pressure
0 ... 1000 bar	High pressure peaks

Functional description

The Parker Service Master CONNECT SCM-600-xx with input module analogue SCMI-600-01 or SCMI-600-03

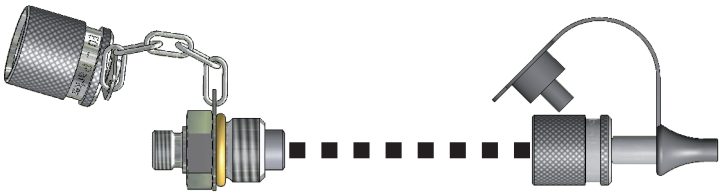


Parker Serviceman Plus SCM-155-0-02



Adapter SCA-EMA-3/3

Measuring hose
SMA3-xxx



Measurement connection EMA-3/xxx

Pressure meter SCP
There is a selection of different measuring ranges for measuring pressure. Sensors can be used for pneumatic applications and also for measuring pressure peaks of up to 1,000 bar.

Pressure / temperature measurement SCPT analogue

- Robust stainless steel design
- Response times of 1 ms
- Capturing of pressure peaks
- Accuracy ±0.5 %
- Laser-welded and labelled

Fast response times guarantee reliable detection of disruptive pressure peaks in the hydraulic system. The robust stainless steel design allows a variety of applications such as for cooling water or in compressed air systems.

All pressure sensors are delivered with a diagnosis adapter (M16x2) installed. Fast and safe connection to the hydraulic system is ensured. Installation times are reduced.

Temperature measurement SCT analogue

- High pressure-resistant temperature sensors
- Measurement of temperatures up to 1000 °C
- Flexible use
- Screw-in or rod sensors

Temperature measurements in hydraulics are used for troubleshooting and preventing damage due to excessively high temperatures on critical components such as pumps or proportional valves.

In order to carry out a precise temperature measurement, the temperature is measured directly in the pipe or hose line.

The SCT-190 series screw-in sensors can also be used in the SCFT-xxx-02-02 turbine flow meter for temperature measurement.

Functional description

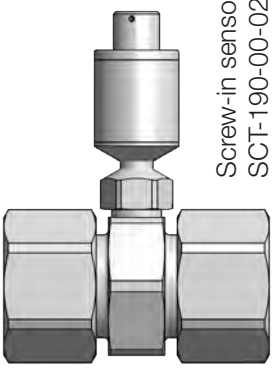
The Parker Service Master CONNECT SCM-600-xx with input module analogue SCMI-600-01 or SCMI-600-03

Connection cable SCK-102-xx-02

Connection cable SCK-102-xx-02

Parker Serviceman Plus SCM-155-0-02

Rod sensor SCT-150-0-02



Screw-in sensor SCT-190-00-02

IN-LINE-Adapter SCA-GMA3/20S/T

Rod sensor SCT-150 (-25 °C...+125 °C)

The SCT-150-0-02 rod sensor measures temperatures in tanks and containers.

Screw-in sensor SCT-190 (-40 °C...+150 °C)

The SCT-190-xx-02 screw-in sensor can be adapted to the hydraulic system up to a system pressure of 630 bar. The screw-in plug is compatible with the GMA3/20 series measuring connections, the SCFT-xxx-02-02 turbine flow meter and the SCLV-xxx-02-02 hydraulic tester.

RPM measurement SCRPM analogue

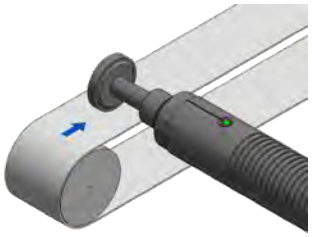
- Also for contactless speed measurement
- Measurement of speeds up to 10,000 RPM
- With 3 m fixed cable

Speed-dependent performance data, such as the feed rate of regulated pumps, can ideally be determined in combination with a pressure and volume flow measurement of a hydraulic drive.

The contactless speed measurement (optoelectronic principle) can be performed quickly and easily.

The speed can be detected on a drive shaft, for example, and displayed in the measuring device. No settings o adjustments required.

Rotating shaft: Contactless speed measurement.



Contact speed measurement with contact adapter.

Front speed measurement with contact adapter.

The included reflective strips are used for the precise detection of the optoelectronic signal.

The speed to be recorded is measured directly with the contact adapter on a shaft or drive unit.

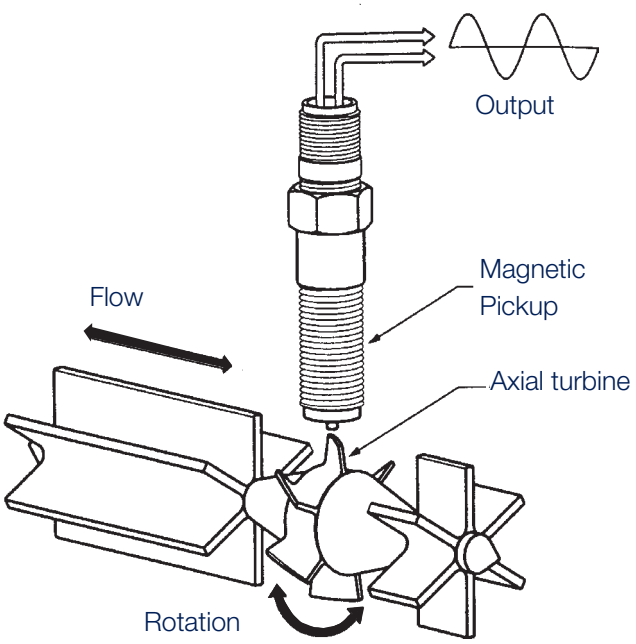
Turbine flow meter SCFT analogue

- 6 measuring ranges up to 750 l/min
- Easy construction
- Small flow resistance
- Built-in pressure and temperature measurement connections
- Suitable for reverse operation



Flow measurement with low flow resistance. Combined p, T and Q measurement possible with additional sensors.

Function

A turbine wheel is driven and rotated by the oil flow. The generated frequencies are processed by digital electronics.
The influences of disruptive flow effects are compensated.
Due to the low flow resistance Q_R the hydraulic circuit is operated with little loss.

The turbine flow meter is equipped with an EMA-3 quick coupling for pressure measurement.

Oil temperatures can be measured directly in the oil flow of the turbine flow meter. This means that all important measured variables are available at one installation location.

Applications

- mobile diagnosis
- p-Q measurement
- Hydraulic test via pressure load valve

Hydraulic tester SCLV analogue and CAN

- Pressure/temperature/flow measuring device
- Simulation of machine states using a load valve
- 2 measuring ranges up to 750 l/min
- Built-in overload protection
- Reverse operation
- Also available with CAN bus connection
- CAN version comes with integrated temperature sensor

Measurement of pressure, temperature and flow

Special features:

- Safe handling in both flow directions, built-in oil bypass protects system, test device and operator against overpressure
- Freely selectable flow direction enables easy connection and measurement
- Can be used quickly on pumps, valves, motors, cylinders and hydrostatic gears

The hydraulic testers have been designed for testing the function of motors, pumps, valves and hydrostatic transmissions. These easy-to-use hydraulic testers can help locate faults in a hydraulic system.

The hydraulic testers can be used to accurately measure pressure, temperature and flow rate during hydraulic system maintenance and troubleshooting on controlled directional control valves as well as when setting valves.

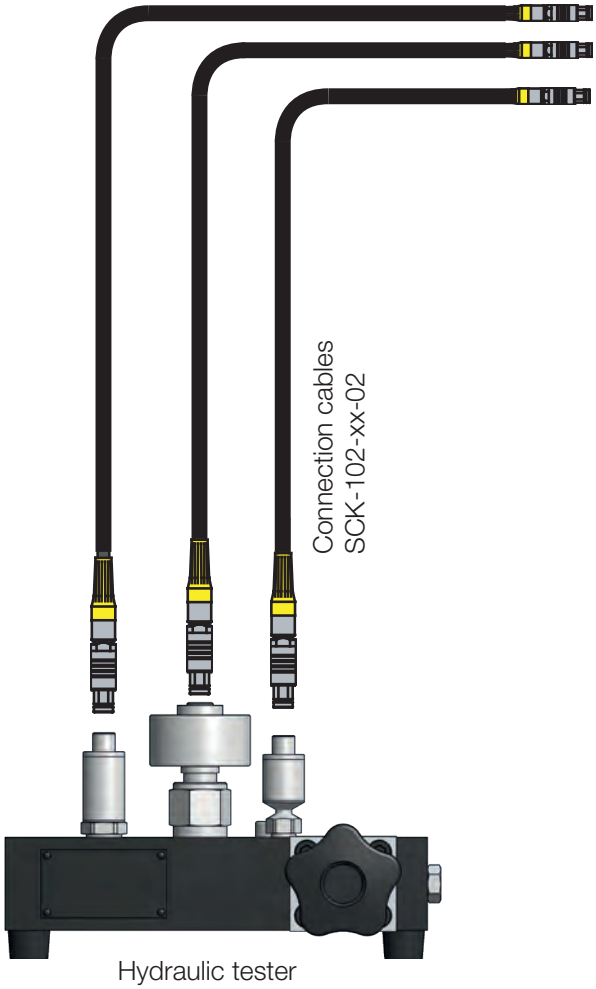
The pressure loading valve with integrated blow-out discs allows a progressive pressure build-up to check the flow over the entire working area.

Built-in safety shutdown (blow-out discs)

The pressure loading valve is mounted with two blow-out discs. These protect the device. If the permitted overpressure P_{Max} is exceeded, the blow-out discs break and the pressure relief valve becomes inactive.
The full volume flow can pass freely to the tank.

To change the blow-out discs, please read the information in the operating instructions.

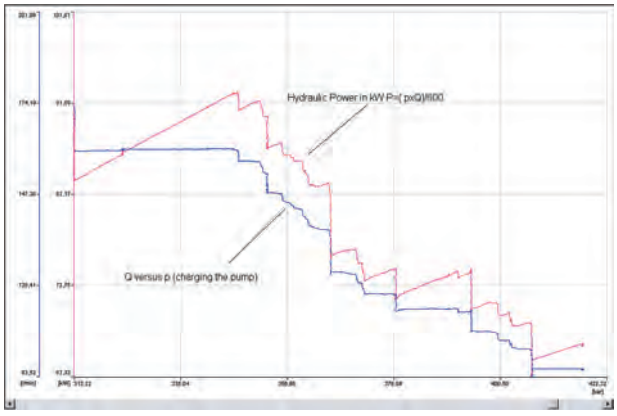
Functional description

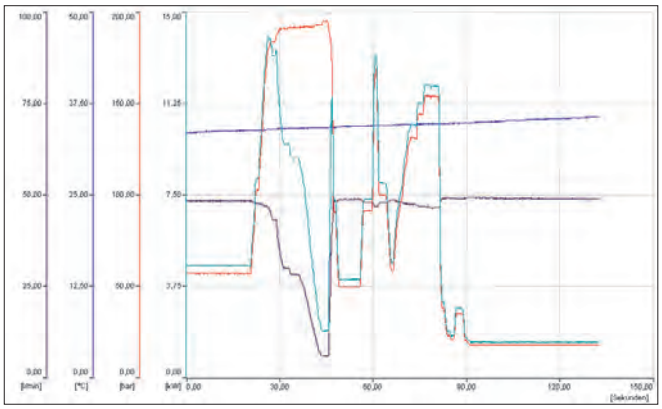


Hydraulic tester
SCLV-PTQ-xxx

Pressure, volume flow and temperature measurement with Parker Serviceman Plus or Service Master CONNECT SCM-600-xx with input module analogue SCMI-600-01 or SCMI-600-03 and hydraulic tester SCLV-PTQ

The determined power is shown in the p-Q curve (figure on the right). This analysis is essential for controlled hydraulic pumps (load sensing) in the case of speed-dependent loads. Evaluation with the PC software **SensoWin®** is quick and easy.





Combined pressure and volume flow measurement (figure on the left) allows insights into a system's hydraulic performance.

The figure shows an application with a hydraulic tester SCLV-PTQ. The built-in pressure relief valve generates pressure in the system.

In the evaluation, the output is calculated from the volume flow of the pump and the pressure.

10…300 l/min, P_{max} = 420 bar, with CAN bus connection	K-SCLVT-PTQ-300-C2-05
20...750 l/min, P_{max} = 480 bar	K-SCLV-PTQ-750
20...750 l/min, P_{max} = 480 bar, with CAN bus connection	K-SCLVT-PTQ-750-C2-05

SCLV-PTQ blow-out discs	Order designation
for 10 ... 300 l/min, P_{max} = 420 bar (4 blow-out discs)	SCLV-DISC-300
for 20 ... 750 l/min, P_{max} = 480 bar (4 blow-out discs)	SCLV-DISC-800

SCFT turbine flow meter including one-way flow control valve	Order designation
6...150 l/min, P_{max} = 400 bar	SCFT-150-DRV
6...150 l/min, P_{max} = 400 bar, with CAN bus connection	SCFTT-150-DRV-C2-05

SCK connection cables analogue	Order designation
3 m (male 5 pin - male 5 pin)	SCK-102-03-02
5 m (male 5 pin - male 5 pin)	SCK-102-05-02
5-m extension cable (male 5 pin - female 5 pin)	SCK-102-05-12

SCK connection cables CAN*	Order designation
0.5 m (male 5 pin - female 5 pin)	SCK-401-0.5-4F-4M
2 m (male 5 pin - female 5 pin)	SCK-401-02-4F-4M
5 m (male 5 pin - female 5 pin)	SCK-401-05-4F-4M
10 m (male 5 pin - female 5 pin)	SCK-401-10-4F-4M
Y-junction CAN	SCK-401-Y
Y-junction CAN incl. 0.3-m cable	SCK-401-0.3-Y
T-junction CAN	SCK-401-T
Terminating resistor** CAN (female 5 pin - female 5 pin)	SCK-401-R

* Other lengths available on request
** Each CAN network requires a terminating resistor

Connection cables SCK

- Compact size
- Interference-free
- Compatible with all diagnosis sensors and diagnostic measuring devices
- Push-pull plug or SPEEDCON* quick-plug-screw connection
- Various lengths available
- Oil-resistant material

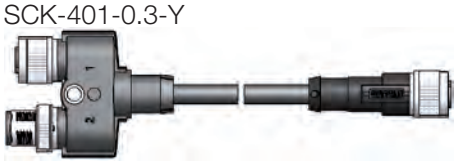
Cables for CAN bus sensors

Parker CAN bus cables are used to connect Parker CAN bus sensors to **The Parker Service Master CONNECT** SCM-600, **The Parker Service Master COMPACT** SCM-370-x-05 or the **Parker Serviceman Plus** SCM-155-2-05.

The SPEEDCON* quick-plug-screw connection makes connecting simple and secure®*.

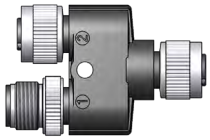
CAN connection cable
SCK-401-xx-4F-4M

Y-junction CAN
SCK-401-0.3-Y



T-junction CAN
SCK-401-T

Y-junction CAN
SCK-401-Y



CAN terminating resistor
SCK-401-R

Cables for analogue sensors

The **SensoControl®** diagnostic cables were designed for use in harsh working conditions.

5-pin version

The 5-pin cables with push-pull plugs are suitable for all 5-pin analogue connections.

4-pin version

Diagnostic cables with 4-pin plugs are only compatible with the Serviceman types SCM-150-1-01/02 and SCM-152-2-08.

Connection cable (5 pin)
SCK-102-xx-02

Extension cable (5 pin)
SCK-102-05-12

Adapter
SCK-002-08
(for connecting 4-pin sensors to newer devices)

SPEEDCON® is a registered trademark of PHOENIX CONTACT GmbH & Co. KG

Technical data

Plug housing		
Material		Cu alloy
Surface		nickel-plated
Protection class (while plugged in)		analogue IP54 CAN IP67

Cable		
Sheathing		PUR
Colour		black
Permitted temperature	Stationary operation Non-stationary operation	-20 … +70 °C -5 … +70 °C
Screen		Cu meshed shield

Supply range and accessories

SCK connection cables analogue	Order designation

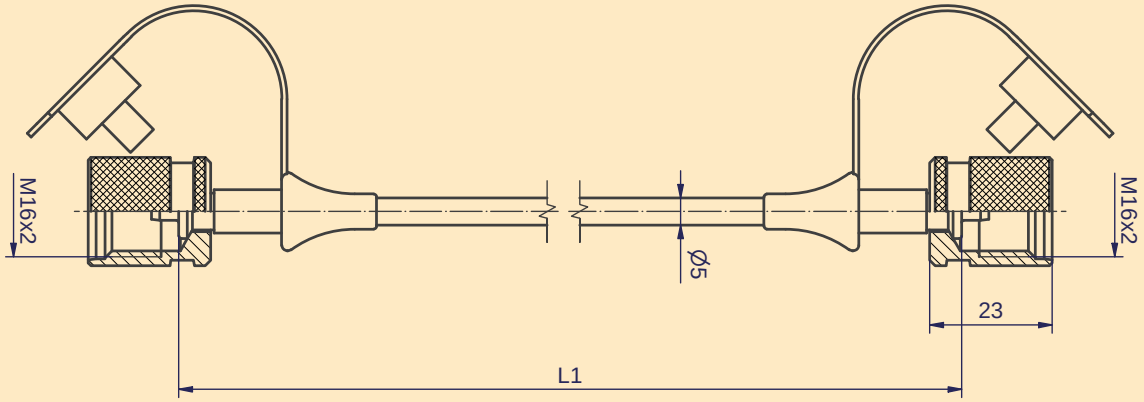
20 SMA measuring hoses

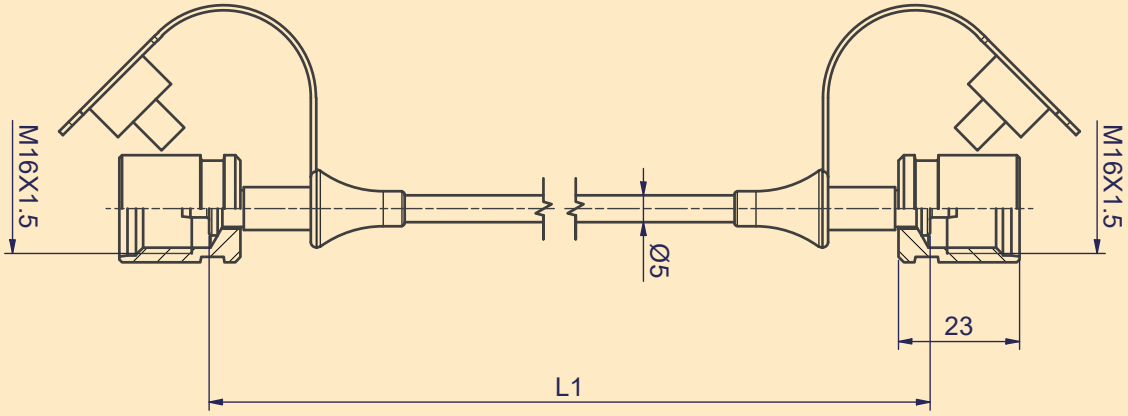
SMA measuring hoses

The connection between the measuring connection and the sensor is made either directly or, in the case of restricted space, via an SMA hose. The measuring hose also decouples the sensor from vibrations and oscillations at the same time.

SMA3-xxx



SMA4-xxx



Technical data

SMA measuring hoses	
Nominal width	DN 2
Nominal pressure	630 bar
Safety factor DF	2.5
Pressure utilisation rate	up to 0 °C: 122% at 30 °C: 110% at 50 °C: 100% at 80 °C: 86% at 100 °C: 77%
Bending radius r	20 mm
Operating temperature	-20 … 100 °C
Sealing material	NBR
Material	Steel, zinc-coated, CR (VI) -free

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion or control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further information call 00800 27 27 5374

AEROSPACE

Key Markets
- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missiles & launch vehicles
- Regional transports
- Unmanned aerial vehicles

Key Products
- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Wheels & brakes

CLIMATE CONTROL

Key Markets
- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Processing
- Transportation

Key Products
- CO^2 controls
- Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors
- Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

ELECTROMECHANICAL

Key Markets
- Aerospace
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

Key Products
- AC/DC drives & systems
- Electric actuators, gantry robots & slides
- Electrohydrostatic actuation systems
- Electromechanical actuation systems
- Human machine interface
- Linear motors
- Stepper motors, servo motors, drives & controls
- Structural extrusions

FILTRATION

Key Markets
- Food & beverage
- Industrial machinery
- Life sciences
- Marine
- Mobile equipment
- Oil & gas
- Power generation
- Process
- Transportation

Key Products
- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

FLUID & GAS HANDLING

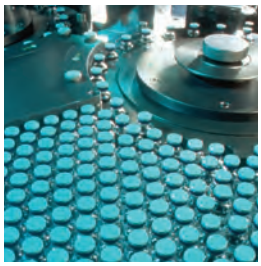
Key Markets
- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile
- Oil & gas
- Transportation
- Welding

Key Products
- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose
- PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

HYDRAULICS

Key Markets
- Aerospace
- Aerial lift
- Agriculture
- Construction machinery
- Forestry
- Industrial machinery
- Mining
- Oil & gas
- Power generation & energy
- Truck hydraulics

Key Products
- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls
- Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects



PNEUMATICS

Key Markets
- Aerospace
- Conveyor & material handling
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Transportation & automotive

Key Products
- Air preparation
- Brass fittings & valves
- Manifolds
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves & controls
- Quick disconnects
- Rotary actuators
- Rubber & thermoplastic hose & couplings
- Structural extrusions
- Thermoplastic tubing & fittings
- Vacuum generators, cups & sensors

PROCESS CONTROL

Key Markets
- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Microelectronics
- Oil & gas
- Power generation

Key Products
- Analytical sample conditioning products & systems
- Fluoropolymer chemical delivery fittings, valves & pumps
- High purity gas delivery fittings, valves & regulators
- Instrumentation fittings, valves & regulators
- Medium pressure fittings & valves
- Process control manifolds

SEALING & SHIELDING

Key Markets
- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductor
- Telecommunications
- Transportation

Key Products
- Dynamic seals
- Elastomeric o-rings
- EMI shielding
- Extruded & precision-cut, fabricated elastomeric seals
- Homogeneous & inserted elastomeric shapes
- High temperature metal seals
- Metal & plastic retained composite seals
- Thermal management
